

## Recloser Legacy Control Package

The Viper<sup>®</sup> recloser product line is available with a variety of recloser controllers (SEL, Beckwith, GE, or others). Adoption of a new relay platform can be a challenge across the organization. To shorten the learning curve and reduce errors, G&W Electric offers a recloser legacy control replacement package. The familiar layout and configuration are designed to reduce training and implementation time in a site-ready package.

### Benefits

- Familiar push button and LED language
- Fits into existing operation practices
- Simplified settings input template to reduce the learning curve
- Integrates into existing automation systems
- Training, Factory Acceptance Testing, and Site Commissioning Support are available to reduce implementation and adoption time
